Acting Guide

“Tell me what to do” *Introduction*

“Tell me what to do!!” If I got paid a dollar for every time I heard those horrible words I would own half of Malibu. That phrase is the ongoing repeating mantra of every new actor, the struggling actor who is spinning their wheels, or hell, every actor that isn’t making a living off of just acting. Most actors when they get to LA just follow what all the other clueless drones are doing out there. They follow them like lemmings right into the sea and drown. Let’s get you an inner tube to stay afloat, better yet let’s teach you to swim. Best yet ... Let’s get you a speed boat so you can fly by them while they suck your wake ... But hey, do it with class ;)

Introduction

Ok ... First off congratulations on buying this book. Why? Because you're going to finally get the answers and finally start to succeed as an actor. This book is designed to give you all the tools, motivation and guidance to "make it". There are only a few markets in the world that you can truly flourish as an actor. Mainly that is Los Angeles, CA and New York, NY. Yes there are many other places you can be an actor (Chicago, San Francisco, Vancouver etc....), and this book is designed to help any actor, no matter where they live and no matter what stage they are in. Some of the information (i.e. is designed for LA) but over 95% of this book is applicable to anywhere. If you bought this and you don't live in the two main markets that is 100% fine. This book is so full of information that you will thrive as an actor no matter what market you are in. Some of the verbage, and links might be more helpful to those in Los Angeles, because, more than likely, if you're going to be a true professional actor, then eventually you need to make the leap to pursue your dreams in the beautiful city of angels.

This book will not make you the next Brad Pitt or Meryl Streep, it doesn't mean it won't either, but it will get you to becoming a working actor if you truly apply what the book tells you. Like with anything out there in the world someone can teach you how to do things but it comes down to you and if you are going to apply it and make it happen. I can only give you the knowledge, you need to have the drive and determination to see it through and to implement what has been taught. Success is in your hands now. What are you going to do with it?

I believe in you. I truly believe that if you have the vision, are pursuing acting for the right reasons, and apply these techniques than you will be successful. Success in acting takes on many different hats, and if you talk to any "star" they will tell you that they never stopped hustling and working at their craft. You are embarking on a lifelong journey that is very fun, very rewarding and very difficult. You can do it, but remember "the road to hell is paved with good intentions." Buying this book means you have the "good intention". No one wants to be bad and go to hell and no one wants to fail and give up on their acting dreams. Find the strength and the will within and you will not be stuck in the actors' hell of no work, no auditions and constant frustration.
